

# Setting Up Lync 2013 for MyCloud Lync

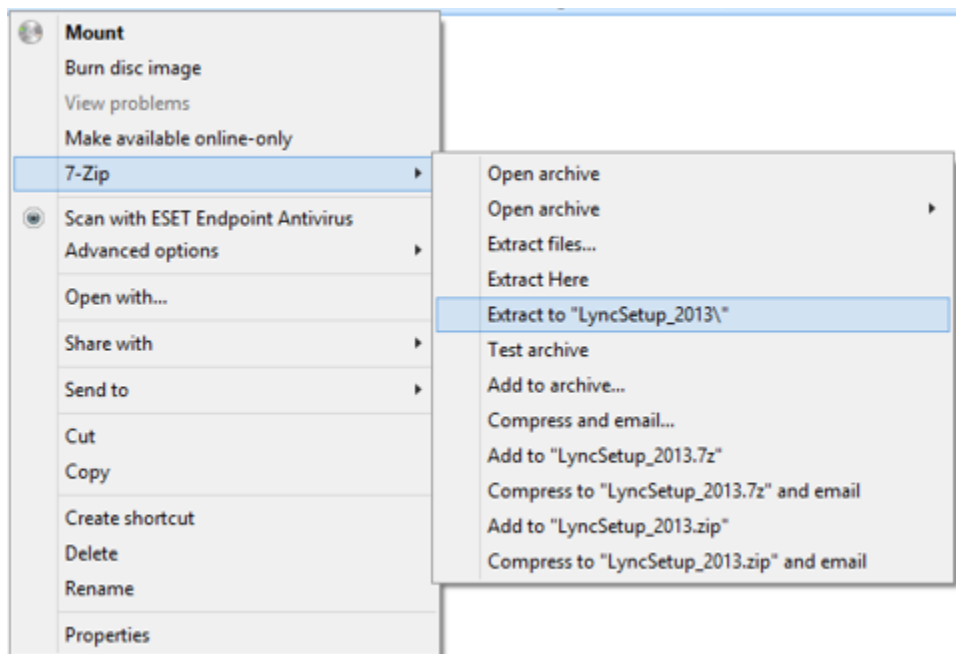

## Downloading applications from the Control Panel

1. Go to <https://cp.ecloudserv.net> and login with the credentials provided by Cerberus
2. Click on Service – Software Downloads and download required application.

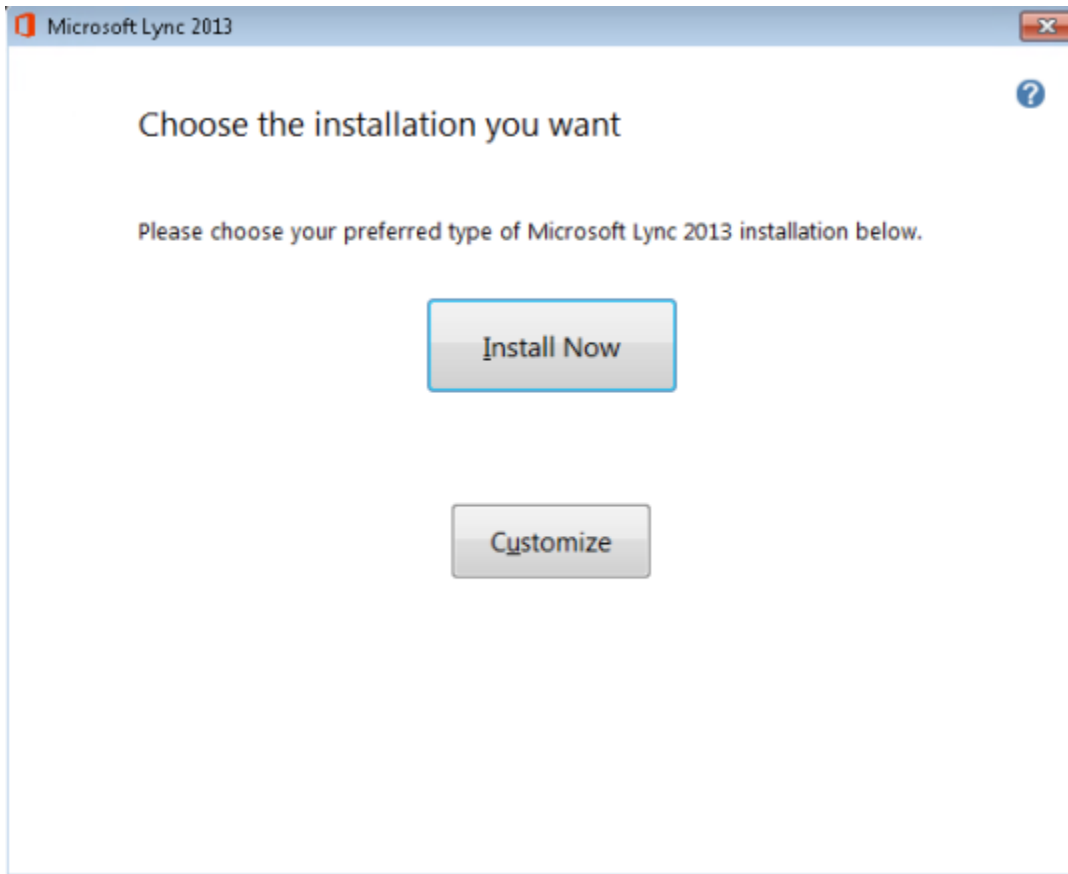

## Installing Lync 2013

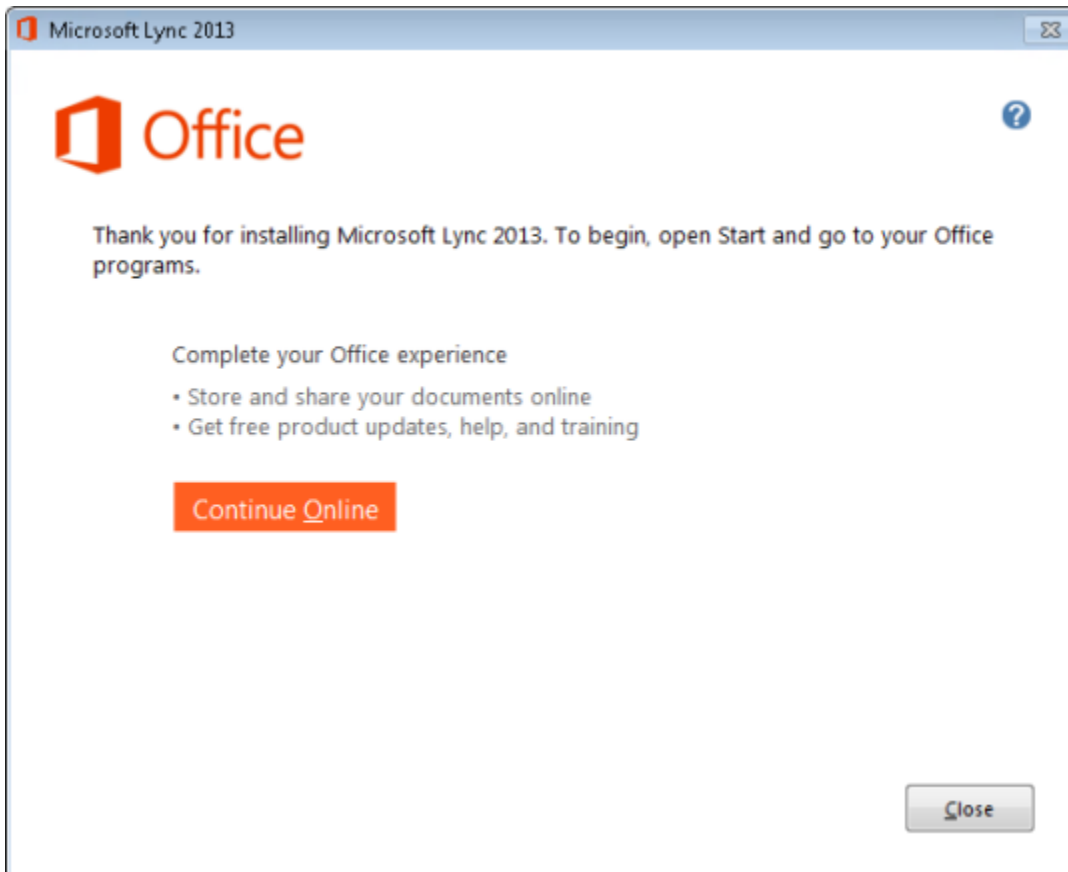

1. Extract the ISO file using 7ZIP application (freeware application can be download from <http://www.7-zip.org/download.html>) or burn a CD using the ISO file.
2. Right click on Lync 2013 ISO, move your cursor to 7-Zip and select Extract to "Lyncsetup\_2013\" and it will extract the setup files to the same location by creating directory named "LyncSetup\_2013".

3. Run setup file from extracted directory **LyncSetup\_2013** and click **Install Now**.

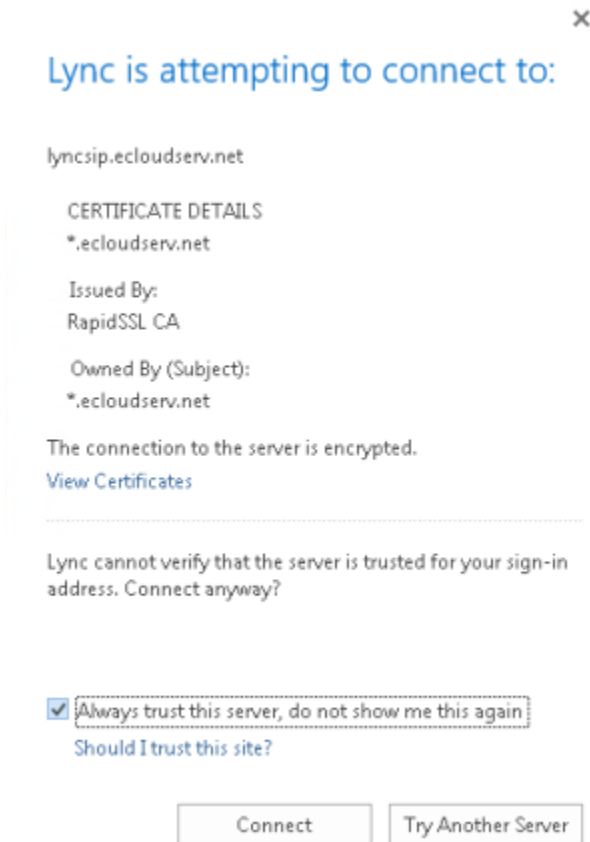

4. Click **Close** to complete the installation.

5. Open Lync 2013 client and type your e-mail address in **Sign in address** and click **Sign In**.

6. Click **Connect** on certificate warning message.

7. Enter your password and it will connect you to Lync Server.
